# ENDNOTES

Note: Figures are as of 9/30/21 quarter end unless otherwise noted

- (1) Represents our core portfolio, which excludes certain investments that fall outside of our typical borrower profile. EBITDA is defined as earnings before interest, tax, depreciation and amortization. This calculation may vary depending on the portfolio company
- (2) Quarterly Return on Equity is calculated using the prior period's ending net asset value per share. Full year Return on Equity is calculated using the prior year's ending net asset value per share pro-forma for the supplemental dividend. Return on Equity since IPO is calculated using ending net asset value per share as of quarter ended 3/31/2014. Note that Return on Equity on adjusted net investment income and adjusted net income exclude the impact of the capital gains incentive fee expense that has been accrued, but not paid or payable, related to cumulative unrealized capital gains in excess of cumulative net realized capital gains less any cumulative unrealized losses and capital gains incentive fees paid inception to date
- (3) Net of Deferred Financing Costs and Interest Rate Fair Value Hedging. Deferred Financing Costs total \$18.4M at 9/30/20, \$17.2M at 12/31/20, \$23.7M at 3/31/21, \$22.3M at 6/30/21 and \$20.8M at 9/30/21. Fair value hedge on interest rate swaps related to the 2024 and 2026 notes total \$18.1M at 9/30/20, \$16.8M at 12/31/20, \$2.2M at 3/31/21 and \$4.5M at 6/30/21 and \$2.5M at 9/30/21
- (4) Pro-forma for unsettled trade receivables / (payables) of \$2.4M at 9/30/20 and \$11.8M at 12/31/20
- (5) Daily average debt outstanding during the quarter/year divided by daily average net assets during the quarter. Daily average net assets is calculated by starting with the prior quarter/year end net asset value and adjusting for capital activity during the quarter/year (adding common stock offerings / DRIP contributions)
- (6) Total yield on investments is calculated based on the interest rate and the accretion of OID, exclusive of investments on non-accrual status
- (7) Interest from investments – interest and dividend income includes accrued interest and dividend income, amortization of purchase discounts (premiums) and certain fees, and accelerated amortization of upfront fees from scheduled principal payments
- (8) Interest from investments – other fees includes prepayment fees and accelerated amortization of upfront fees from unscheduled paydowns
- (9) Other income includes amendment fees, syndication fees, interest on cash and cash equivalents and miscellaneous fees
- (10) New investments are net of sell-downs
- (11) Fundings exclude intra-quarter revolver borrowings that are repaid by quarter-end
- (12) Par value; excludes amortization, excess cash flow sweeps, PIK, FX movements, and intra-quarter revolver borrowings that are repaid by quarter-end
- (13) Interest rate on debt outstanding includes the swap-adjusted interest expense related to our Convertible Notes and Unsecured Notes
- (14) In connection with the note offerings, the Company entered into interest rate swaps to align the interest rates of its liabilities with its investment portfolio, which consists of predominately floating rate loans. In connection with certain notes repurchases, the Company entered into additional interest rate swaps to reduce the notional exposure of its existing interest rate swaps related to the notes to match the current principal amount of notes outstanding. As a result of the swaps, the effective interest rate (excluding OID) on the 2023 notes is LIBOR plus 1.99%; the effective interest rate (excluding OID) on the 2022 convertible notes is LIBOR plus 2.11%; the effective interest rate (excluding OID) on the 2024 notes is LIBOR plus 2.28%; and the effective interest rate (excluding OID) on the 2026 notes is LIBOR plus 1.91%
- (15) Weighted by amortized cost of debt investments. Investments are financed by debt and equity capital. This analysis assumes longer-dated investments are currently funded by equity capital (54% of investments) and the remaining (shorter-dated) investments (46% of investments) are currently funded by debt financing. Investments for purposes of this analysis exclude unfunded commitments, and equity capital is defined as 9/30/21 net assets
- (16) Convertible Notes and Unsecured Notes treated as floating rate due to interest rate swaps TSLX entered into to swap fixed notes payments for floating rate payments
- (17) Weighted by gross commitment amount
- (18) Interest rate on the facility is a formula-based calculation. If the Borrowing Base is equal to or greater than 1.85 times the Combined Debt Amount (i.e. 1.85x total commitments), the applicable margin is L+1.75%
