When viewed in combination with our tax-driven special dividend, this equity raise: 1) allowed us to remain leverage neutral to year-end level (beneficial for our liquidity and capital position); and 2) was ROE-accretive given the reduction in excise tax as a result of the special dividend

^{1.} Pro forma for payment of the \$1.25/share special dividend and public offering of 4,000,000 shares of common stock for total gross proceeds of approximately \$86.6 million

^{2.} Based on figures for quarter ended Q4 2020. Debt / Equity is as of quarter-end Q4 2020, not adjusted for unsettled trade receivables / (payables)

^{3.} Cost of funds reflect the annualized interest expense over average debt outstanding for the period ended 12/31/2020, giving effect to the swap-adjusted interest rate on our convertible notes and unsecured notes, additionally adjusted to reflect the \$300 million issuance of the 2026 unsecured notes that closed in February 2021, the net proceeds of which were used to pay down a portion of the outstanding revolver borrowings, and the February 2021 amendment to the revolving credit facility, which extended the maturity date to February 2026 and upsized the facility by \$150 million to \$1.485 billion

^{4.} Management fees expressed as percentage of assets is 1.50% on all assets financed using leverage under 1.0x debt to equity and 1.0% (after waivers) on all assets financed using leverage over 1.0x debt to equity; 17.50% incentive fee

^{5.} Reflects average operating expenses for the year ending 12/31/2020 in addition to excises taxes which totaled \$5.76mm or 0.27% of average total assets for the year ended 12/31/2020. The excise tax is based on the level of spillover income, which for the purposes of this analysis, is reduced by the proposed special distribution, resulting in a lower excise tax level

SECTOR OBSERVATIONS

BDC SECTOR PRICE-TO-BOOK VS. ROE ON NET INCOME (SINCE TSLX IPO)

The market is generally efficient at pricing a manager's ability to earn its cost of capital

- 1. Calculated as average daily price per share from 3/21/2014 to 12/31/2021 divided by NAV per share at 3/31/2014, or earliest reporting period for BDC peer who went public after 3/31/2014
- 2. Calculated as cumulative reported net income per share from 3/31/2014 to 12/31/2021, or latest available, divided by beginning NAV per share at 3/31/2014, adjusted for annual basis. For TSLX, the cumulative net income per share is adjusted to exclude the capital gains incentive fee expense that was accrued, but not paid, related to cumulative unrealized capital gains in excess of cumulative net realized Capital gains less any cumulative unrealized losses and capital gains incentive fees paid inception to date

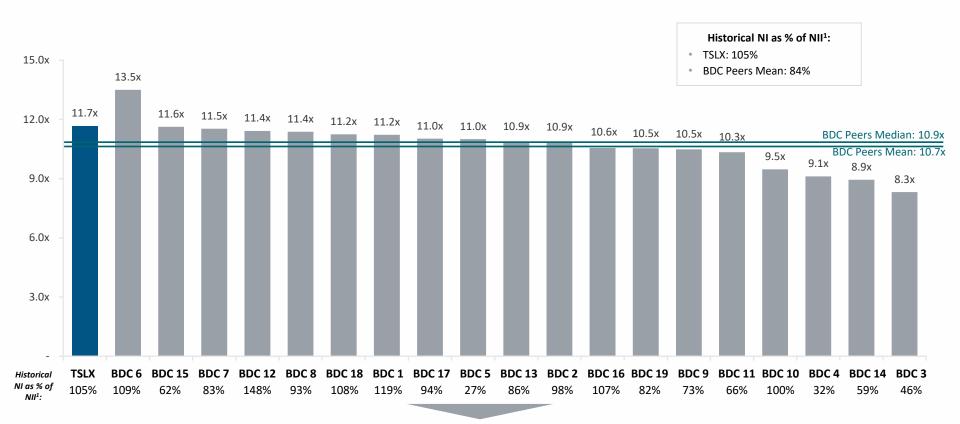

Note: BDC Peers consist of 19 externally managed BDCs in the S&P BDC Index with total assets greater than \$750 million based on quarter ended 6/30/21 financials Source: SNL Financial
